

Not All Unequal End Mills Were Created Equal...

...and we
have the
PATENT
to prove it.

The milling industry is becoming increasingly "unequal." But choose wisely. The Z-Carb is the original and only end mill with patented unequal helix geometry.

Unequaled Performance

- Improves productivity up to 30 times over conventional 4-flute end mills
- Increases feed up to 5 times
- Increases speeds 50%
- Achieves a 100% increase in radial width of cut
- Improves material removal rate up to 10 times
- Reduces chatter and improves surface finish
- Reduces noise
- Reduces harmful machine vibration
- Exclusive SGS Ti-NAMITE-A® (AlTiN) coating for increased tool life
- Z-Carb-HTA exclusively designed for high temperature alloys
